ADJUSTMENT POLICY FOR SWIMMING POOL FILL FOR EDINBURGH MUNICIPAL UTILITIES

There is no water adjustment for filling a swimming pool. However, there MAY be an adjustment for the sewer portion of the bill. The following rules apply to receive this adjustment:

- There is already a sprinkler adjustment given for the usage for the months of June, July, and August which are billed in July, August, and September. The billing for these three months is calculated based on the usage during the previous months of October, November, and December. There will be no additional adjustment given for pools during these months.
- Pools that are filled during any other month may receive an adjustment however, this adjustment will only be given once during the calendar year. If a pool is refilled during any other months besides June, July, and August there will not be a second adjustment during that calendar year.
- This adjustment will only be given for pools that are drained into the grass not into the sewer system. If it is determined that the pool is drained into an area that feeds directly into the sewer system, an adjustment will not be given.
- This adjustment will be shown as a credit on the following month's bill after the request has been processed.

APPLICATION FOR POOL ADJUSTMENT

Name on account _____

Account Number _____

Address _____

Phone number _____

Date the pool was filled _____

Type of pool: In-ground _____ Above ground _____

Pool dimensions Length _____ Width _____

Depth _____ Gallons _____

I understand this adjustment is only for one time each year and is only valid for water that is drained into the grass and does not go into the sewer system in any way. I understand that Edinburgh Municipal Utilities reserves the right to inspect the draining of this pool.
